

5nine V2V Easy Converter

Free Edition

Summary

Free 5nine V2V Easy Converter performs fast and non-intrusive conversion and fixup of selected VMware Virtual Machines to Windows Hyper-V VMs with highest conversion success ratio.

Product description and benefits

5nine V2V Easy Converter can be used as a standalone tool on different versions of Windows Server, including Microsoft Hyper-V Server 2012 R2/2012/2008 R2 (SP1), Windows Server 2012 R2/2012/2008 R2 (SP1) GUI and Core installations and does not require any additional software licenses.

5nine V2V Converter supports conversion of Windows Server 2012 R2/2012/2008, Windows 8.x/7, Windows Server 2003 (x86 and x64), and most of Windows 2000 Advanced Server, Ubuntu and CentOS configurations.

5nine V2V Easy Converter:

- Is a free standalone tool and doesn't require any additional software licenses
- Performs convenient host to host conversion
- Is fast, effective and easy to use
- Performance testing showed up to x10 times higher conversion speeds than the current competition
